

Global Neon Gas Market 2015-2019

Research Report on “ Global Neon Gas Market 2015-2019 ”

About neon gas

Neon, a noble gas, is a chemical element that is found to exhibit chemical inertness on account of its unique atomic structure. This highly unreactive gas has a wide range of usage in non-reactive

applications. Neon, although abundant in the universe, is sparse in earth's atmosphere and is often produced through fractional distillation of liquefied air. The gas has superior refrigerating capacity than helium and is a preferred refrigerant in certain applications. Neon in mixture with other gases is widely used in lighting and imaging applications. For instance, helium-neon lasers that are indispensable in various industrial and imaging applications use a mixture of helium and neon in the ratio 10:1.

Technavio's analysts forecast the global neon gas market to grow at a CAGR of 4.99% by revenue and 9.98% by volume over the period 2014-2019.

Covered in this report

Technavio's report, Global Neon Gas Market 2015-2019, has been prepared based on an in-depth market analysis with inputs from various industry experts. The report includes a comprehensive discussion of the market, an extensive coverage on different application segments, demand-supply dynamics in various geographies, and distribution method. The report provides comments on both the existing market landscape and its growth prospects over the forecast period. The report further includes a discussion of the key vendors operating in this market.

The report presents data on the following segments of the market:

Application: imaging and lighting, cryogenics, industrial application, and electronics

Geography: APAC, North America, and Latin America

Distribution method: tonnage, merchant, and packaged

Key vendors

- Air Liquide
- Airgas
- Linde
- Messer Group
- Praxair
-

Other prominent vendors

- Air products
- Air water
- American gas group
- BASF
- Core gas
- Gazprom

Market drivers : Perennial demand from lighting and imaging applications

Market challenges : Production deficits and price volatility

Market trends : Growing prominence of repackaging and customized gas formulations
